Federal Communications Commission Authorization and Evaluation Division 7435 Oakland Mills Road Columbia, Maryland 21046

Subject: FCC ID: EHA802UIAG

Dear Application Examiner:

The 802UIAG 802.11abg radio module, FCC ID: EHA802UIAG is contained within the Intermec Model CK60 handheld terminal. The CK60 can be used with the Intermec Model 6820 printer, which contains the BTS080 Bluetooth radio module, FCC ID: EHABTS080-1.

Configurations of the 6820 include a wall-mount option, where the BTS080 is located within the 6820, and the CK60 is operated remotely. Other configurations utilize a CK60 terminal holder, which is mounted on the 6820. For these configurations, BTS080 is fixed to the terminal holder. Electrical connection of the BTS080 to the 6820 is the same for all configurations.

Some differences in 6820 configurations include mounting of the CK60 terminal holder on the left side of the printer, the right side of the printer, and centered on the front of the printer. These configurations are electrically similar with regard to position of the BTS080 radio module on the CK60 terminal holder and connection to the 6820.

Please contact me by telephone at (425) 356-1765 or by e-mail (sean.mackellar@Intermec.com) if there are questions or additional information needed concerning this request.

Sincerely,

See Ma Hell
