Federal Communications Commission Authorization and Evaluation Division 7435 Oakland Mills Road Columbia, Maryland 21046

Subject: FCC ID: EHABTS080-1

Dear Application Examiner:

The BTS080 Bluetooth radio module, FCC ID: EHABTS080-1 is contained within the Intermec Model 6820 printer, allowing Bluetooth communication between the printer and the 700C, CK60, or CN3 handheld terminals.

Configurations of the 6820 include a wall-mount option, where the BTS080 is located within the 6820, and the handheld terminals are operated remotely. Other configurations utilize a terminal holder, which is mounted on the 6820. For these configurations, the BTS080 is fixed to the terminal holder. Electrical connection of the BTS080 to the 6820 is the same for all configurations.

Some differences in 6820 configurations include mounting of the terminal holder on the left side of the printer, the right side of the printer, and centered in front of the printer. There are different terminal holders for each handheld terminal: 700C, CK60, and CN3. These are electrically similar with regard to position of the BTS080 radio module and connection to the 6820. Differences in the terminal holder design is specific to the plastic molding, allowing docking of the intended handheld terminal.

Please contact me by telephone at (425) 356-1765 or by e-mail (sean.mackellar@Intermec.com) if there are questions or additional information needed concerning this request.

Sincerely,

Seen Into Hell
