Hillsboro, OR 97124

October 11, 2006

Dear Application Examiner:

On behalf of Intermec Technologies Corporation, Northwest EMC is submitting this application for a Class 2 Permissive Change for the Bluetooth radio, FCC ID: EHABTS080. The radio is installed in Intermec's 700C handheld computer. The Socket Bluetooth radio, M/N: BTS080, has been previously certified for use in the 700C. Intermec has made no changes to the hardware or software of the Bluetooth radio. Intermec is seeking a C2PC to co-locate the radio in the 700C with a CDMA radio (FCC ID: EHAEM3420) and 802.11 radio (FCC ID: EHADRCB)

The CDMA radio, EM3420, has been previously certified for use in the 700C under the FCC ID: EHAEM3420. The 802.11 radio, DRCB, has been previously certified for limited modular approval in the 700C under the FCC ID: EHADRCB.

Intermec has made no changes to the EM3420 or the DRCB radios. Intermec has provided SAR reports for the co-located configurations (under separate filings for the other radios), as well as labeled photos, sample ID labels, and compliance inserts for the users manuals.

The exhibits provided demonstrate compliance with the FCC rules for a Class 2 Permissive change.

Your efforts in reviewing this application are greatly appreciated.

Best regards,

Northwest EMC, Inc.
