Overview

This application is to approve Itermec's IP30 device (Model IM4), FCC ID: EHAIM4, with a new RF Exposure condition. The new RF Exposure condition occurs when the IP30, which contains previously approved radio modules IM4 and BTM4, is configured with either a CK3X or CK3R mobile computer. The CK3X is a mobile computer model 1007CP02, FCC ID: EHA-1007CP02. The CK3R is a mobile computer model 1007CP01, FCC ID: EHA-1007CP01. Only one of these computers can be docked with the IP30 at any one time. No changes have been made to any of the radios or hardware. The MPE exhibits submitted show compliance of this new RF exposure configuration.

Recommendation

All items have been resolved and completed to my satisfaction; therefore I recommend this application for approval.
