

NORTHWEST EMC, INC.

22975 NW Evergreen Parkway, Suite 400
Hillsboro, OR 97124

September 28, 2005

Dear Application Examiner:

On behalf of Intermec Technologies Corporation, Northwest EMC Inc is submitting this application for the certification of Intermec's IM4 transmitter, FCC ID: EHAIM4. It operates in the 902-928 MHz band with a peak output power of 860.99mW. It is a FHSS RFID Reader in a PCMCIA Type II package.

Intermec Technologies Corporation is seeking full modular approval under FCC 15.247. The EUT can operate with several different antennas as described in this application. The IM4 module will be factory installed in Intermec products. The IM4 card will also be sold to OEMs who will be responsible for obtaining approvals in their own host devices with their own antenna options.

The receiver portion of this radio transceiver has been verified to FCC 15B.

The technical reports and exhibits demonstrate compliance with FCC rules 47 CFR 15.247.

Your efforts in reviewing this application are greatly appreciated.

Best regards,

Northwest EMC, Inc.
