To whom it may concern:

This letter is intended to explain that the Intermec Technologies Corporation 700C hand held computer offers a configuration that contains only an MC75 GSM/GPRS radio module.

MC75 only configuration for initial certification:

The photos included in the EHAMC75 filing show an Intermec 700C unit that includes all three of the available radio modules. The three radio module unit was the only one that was available at the time for photographs. The EHAMC75 filing that includes only the MC75 GSM/GPRS radio module will be completed using the TCB process. The 700C unit will only be sold with the MC75 radio module under this initial certification.

Class II Permissive Change Filings:

After the EHAMC75 TCB filing has been completed, the EHABTS080 and EHADRCB filings will be updated with Class II Permissive Change filings to include collocation of these three radio modules. At that time the three radio module version of the 700C will be offered for sale with all three of the radio modules installed.

Please contact me using the contact information below if there are any questions.

Sincerely,

Scott J. Holub
