RE: Tune-up Procedure for FCC ID: EHASMC46 GSM Module in 700C Hand Held Computer

To whom it may concern,

The MC46 tri-band GSM module requires no adjustments of components after assembly. The 700C hand held computer host device, likewise, requires no adjustments of components after assembly. Settings for radio and hand held computer operation require specialized equipment only available to Intermec manufacturing and service personnel.

Please Contact me if there are any questions.

Yours truly,

A handwritten signature in black ink, reading "Scott J. Holub". The signature is written in a cursive style and is placed over a light gray rectangular background.
