Hello Chieu,

Review of composite DTS and NII applications is complete. Please reply to the following items. Because the issues are the same for both applications, your response to this notice will be applied to both applications.

Q1: No schematic exhibit was included with the application. A schematic exhibit is required for intentional radiators. Please provide schematic(s) exhibit(s).

Q2: Since in this case the device being certified is the LifeBook, external and internal photos of the LifeBook should be included with the application. Only photos of the Atheros module were included. Please provide revised or additional external and internal photo exhibits to include the LifeBook T1010 and T5050. Short term confidentiality will be applied to these photos per the confidentiality request letter.

Q3: Short term confidentiality was requested only for the internal and external photo exhibits. The test setup and test various test reports contain photos, but test reports cannot be held for short term confidentiality. Please confirm that this is consistent with your expectations, or extract photos only to separate exhibits that can be held under short term confidentiality.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.

Best regards,

Tim Dwyer

Hello Chieu,

Review of composite DTS and NII applications is complete. Please reply to the following items. Because the issues are the same for both applications, your response to this notice will be applied to both applications.

Q1: No schematic exhibit was included with the application. A schematic exhibit is required for intentional radiators. Please provide schematic(s) exhibit(s).

A1: Please find attached Schematic for Atheros AR5BHB92
--Confidential document.

Q2: Since in this case the device being certified is the LifeBook, external and internal photos of the LifeBook should be included with the application. Only photos of the Atheros module were included. Please provide revised or additional external and internal photo exhibits to include the LifeBook T1010 and T5050. Short term confidentiality will be applied to these photos per the confidentiality request letter.

A2: External/Internal Photos attached (Tx010). Please make the internal photos confidential.

Q3: Short term confidentiality was requested only for the internal and external photo exhibits. The test setup and test various test reports contain photos, but test reports cannot be held for short term confidentiality. Please confirm that this is consistent with your expectations, or extract photos only to separate exhibits that can be held under short term

separate chambers that can be held under these terms
confidentiality.

A3: Thanks for the information. This is OK.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.

Best regards,
