Columbia, MD 21046

Subject: Limited Modular Transmitter Approval

FCC ID: ELY547-36-0029-R

To Whom It May Concern:

Jeckson Electric Co., Ltd. is requesting a Limited Modular Approval for the FCC ID mentioned above. We will only market our module to specific OEM customer - **Dimplex North America Limited**. They will install this module only in their own end products and they will be made aware of the requirement that the modular only be installed in this OEM only.

Following items describe how our module meets the specific modular approval requirements of 15.212

1. The modular transmitter does not have its own RF shielding and complied Section 15.249. (Please refer to "Test report")
2. The modular transmitter has a SPI (Master) and a SPI (Slave) to buffer modulation/data inputs. (Please refer to "Block Diagram" and "Schematic")
3. The modular transmitter has the own power supply regulation and had complied Section 15.207. (Please refer to "Schematic")
4. The modular transmitter used a permanently antenna (on board PCB trace) that complies with the antenna requirements of Section 15.203.
5. The modular transmitter has tested in a stand-alone configuration and complied Section 15.207, 15.209 & 15.249. (Please refer to "Test report")
6. The modular transmitter has been labeled with its own FCC ID number (Please refer to "Label & label location")
7. The module is complied Section 15.207, 15.209 & 15.249, and the radio frequency circuitry will not be affected after the installation of the end product. The instruction & install requirement will explain in the user manual. (Please refer to "Test report" & "User Manual")
8. The antenna of the modular transmitter in the final product will be at least 20cm from users and nearby persons; modular transmitter complies with RF exposure requirements.

Sincerely,

  
Henry Chan  
Senior Electronic Engineer
