FCC ID: EMJMMORFDJUL
Operational Description
The transmitter of the EUT (Lenovo Laser 2.4G Mouse) is powered by 3.0Vdc from batteries. The type of antenna is Printed antenna. The output power of this device is very low. Under normal use condition, the transmitter and the receiver are quite close, so high EIRP power is neither necessary nor allowed because of interference.

Report No.: RF971211A01
