undesired operation.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two

· This device may not cause harmful interference; and This device must accept any interference received including interference that may cause

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with manufacturer's instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following

• Reorient or relocate the receiving antenna.

• Increase the separation between the equipment and receiver. Connect the equipment to an outlet on a circuit different from that to which the receiver

· Consult the dealer or an experienced radio/TV technician for help.

Statement of Compliance with EU Directive

This is a Class B product, in a domestic environment, this product may cause radio interference, in which case the user may be required to take adequate measures.

Declaration of Conformity (RT&TTE directive 1999/5/EC)

The following items were completed and are considered relevant and sufficient:

• Essential requirements as in [Article 3]

• Protection requirements for health and safety as in [Article 3.1a].

• Testing for electric safety according to [EN60950].

• Protection requirements for electromagnetic compatibility in [Article 3.1b].

· Testing for electromagnetic compatibility according to [Article 3.1b]. • Effective use of the ratio spectrum as in [Article 3.2].

• Radio test suites according to [EN 300 440].

CAUTION: Any changes of modifications not expressly approved by the grantee of this device could void the user's authority to operate the

ASUS Recycling/Takeback Services

ASUS recycling and takeback programs come from our commitment to the highest standards for protecting our environment. We believe in providing solutions for you to be able to responsibly recycle our products, batteries, other components, as well as the packaging materials. Please go to <u>http://csr.asus.com/english/Takeback.htm</u> for the detailed recycling information in different regions.
