

## Operational Description

The transmitter of the EUT (Pen & Touch Tablet) is powered by 5.0Vdc from host equipment. The type of antenna is Integral antenna. The output power of this device is very low. Under normal use condition, the transmitter and the receiver are quite close, so high EIRP power is neither necessary nor allowed because of interference.

The EUT is operates in 666kHz.

For more detailed instruction, please have a look at the user's manual.
