What's Included

The AUX jack allows you to listen to music on any non-Bluetooth device that is equipped with a 3.5mm headphone jack. Connect the included audio cable to the AUX jack on the right earcup of your headphones, and to the headphone jack of your auxiliary music source. Your headphones should be in the Power "Off" mode. Use the volume and track navigation controls on your music player as you would with any wired headphones.

Charging Your Headphones

Your Bluetooth headphones operate on a built-in rechargeable battery. Make sure to charge the battery before using the headphones for the first time.

To charge the battery, connect the larger plug of the included USB charging cable to the powered USB port of a computer or a USB/AC adapter, and then connect the smaller plug to the USB charging port on the side of the right ear cup.

The Charging Indicator will glow red while the headphones are charging. The indicator will turn off when the headphones are fully charged and ready to use.

When fully charged the battery should provide up to **24 hours** of continuous play at a normal listening level. If operated at maximum volume the music playing time will be reduced.

NOTE: While charging, the headphone power will turn off to conserve battery power and minimize charging time.

Internal Rechargeable Lithium-ion Battery

This device uses an internal rechargeable lithium-ion battery that should last the lifetime of the device. If you suspect your battery may be dead, try charging it several times. If problems persist, please do not attempt to repair unit; see warranty for factory service.
