Re: **Class II Permissive Change Application**  
**FCCID: EO940GN-1**

Dear Mr. Czumak:

This letter accompanies the application for a Class II Permissive change for the FCC ID# listed above. A test report document and photos are included electronically and a check for payment is being forwarded to Pittsburgh via U.S. Mail. This application pertains to the Itron device, model number 40WN.

The only changes to the design since the approval of the Class II Permissive Change on April 20, 1999 are minor changes to make the device more manufacturable. While the changes are minor, Itron feels a Class II application is warranted in order to allow Itron the flexibility of using Class I Permissive Change criteria in the future.

If you have any questions on this project, please contact me at (800) 441-1298 ext. 3323 or via email at [klaus.bender@itron.com](mailto:klaus.bender@itron.com).

Sincerely,

Klaus Bender  
Project Manager
