Subject: Request for Class 2 Permissive Change
IC: 864A-CCU100TB

Dear Sir/Madam:

Itron hereby requests a Class 2 Permissive Change for an Automatic Meter Reading device for reading of utility meters, IC: 864A-CCU100TB. The family contains one model, TOWERCCUB.

The change is to add the following updated modules as the current modules will be going obsolete:

- = A Cellular 4G capable certified module in place of the 3G module.
- = Only the digital portion of the module that contains the WiFi transceiver, the WiFi transceiver itself is not in need to be replaced.
- = The GPS receiver.

Testing has been performed and reports, including the RF exposure report with updated 4G modem, have been filed showing the CCU100TB remains in compliance.

Sincerely,

A handwritten signature in black ink that reads "Jay R. Holcomb". The signature is written in a cursive, flowing style.
