Subject: Class 2 permissive change description  
FCC ID: EO9-G5R

Dear Sir or Madam:

This is a class 2 permissive change to extend the maximum frequency of our G5R handheld from 957 to 960MHz. No modifications were made to the device in order to do this. It is merely to allow us to ship the transmitter with the frequency value in the configuration file loaded at frequencies in the upper portion of the MAS band.

This permissive change is for the US only. We do not wish to pursue a permissive change to our frequency range in Canada at this time.

If you have any questions, then please feel free to contact me at 507-837-5264. I can also be reached by email at [drew.rosenberg@itron.com](mailto:drew.rosenberg@itron.com).

Sincerely,

Drew Rosenberg
