

Appendix A

Non-Conformities for US Radio Equipment Authorization

Non-Conformities FCC ID: EO9HHSR (CKC CS Ref # E08-000068-FCC-01)

The items listed below represent requests for information following review of this application for certification under United States (FCC) regulations. Further question may arise pending review of responses to these items.

OK	ID	#	Non-Conformity or Comment	Submitted Response	Respondent / Date of Response
x	TCB	1	KDB 235165 pending for confidentiality. Request under FCC review for inclusion of internal photos.	Updated confidentiality letter provided.	Itron 9/3/08
X	C	2	The operational description provided in "technical description.pdf" is insufficient for the purpose of 2.1033(b)(4). Please provide an updated operational description including a brief description of the circuit functions of the device along with a statement describing how the device operates, is modulated and meets the requirements. This should include a description of the ground system and antenna (if any). It must describe the EUT completely both in brief and in detail. Note: The required signal information includes modulation type, pulse repetition rate, signal type and information sent.	Updated operational description provided.	Itron 8/7/08
X	C	3	The antenna information provided does not clearly identify the approved antenna(s). Please identify the approved antenna(s) for this transmitter.	The antenna part number that we use is part MEXE902RPSM	Itron 8/7/08
X	C	4	It was our original understanding that this product has multiple operational modes eg, low power and high power (based on the original discussions of the HHSRISM). Please clarify the operational modes of the equipment.	There is no immediate need for high power mode in the field. We understand and are willing to accept the fact that this module cannot be marketed to transmit above the 15.249 limits. A second application will be submitted to allow for high power mode in the future. This will not be a modular approval application and will be an application for approval of a	Itron 8/7/08

				device that has this module installed. The timing for this application will be determined by how well testing goes this week. However, it is not worth holding up this 15.249 approval.

		6			

The items indicated above must be submitted before processing can continue on the referenced application. Failure to provide the requested information within 60 days may result in application dismissal pursuant to Section 2.917(c) and forfeiture of the filing fee pursuant to Section 1.1106.

How to read the table:

OK column indicates closure by CKC CS.

ID column is for use with Agents to assist in identifying the probable source for closure.

A – Application issue

TL – Test lab issue

C – Client issue

R – Retesting may be necessary

column indicates unique or separate non-conformity items (note some items may be related).

Non-Conformity or Comment column indicates the evaluators specific question or comment.

Submitted response column indicates the response or a summary of the response provided.

Respondent / Date of Response column indicates the responding party or agent and the date of the response was either received or logged.
