<p>For the collocation with SK9SNIC1 module, where is the RF exposure assessment showing compliance of the combination?</p> <p>It appears that the PCII for SNIC includes assessment for EO9ORRN, but not for EO9ORRNA which includes a slightly higher output power.</p> <p>Furthermore, schematics indicate a wifi connection. Has RF exposure been evaluated for collocated wifi? Or is this part not presently an option in the ORRNA?</p>	<p>will be with the SK9SNIC1, c2pc.</p> <p>a new SK9SNIC1 c2pc was sent to the their TCB this week.</p> <p>the WiFi is part of the SNIC1 and is being done there.</p> <p>In the end this grant is only for the base unit w/o the SNIC1..</p>	<p>JH / 17feb18</p>
