Re: FCC ID: EROCWD7191

To Whom It May Concern:

The following application is submitted on behalf of our client, Crestron Electronics Inc, for evaluation of their model CWD7191 for single modular approval certification under FCC Part 15.247.

The CWD7191, with a dipole antenna or an integrated SMD antenna, is a two-way radio frequency (RF) module that utilizes the 2.4 GHz frequency band to communicate with other devices. The module operates according to the IEEE 802.15.4 specification and can be configured to minimize the possibility of interference with other devices.

The CWD7191 was tested in full to the requirements of the aforementioned rules and was found to be in compliance.

Sincerely,

A handwritten signature in black ink that reads 'R. Sam Wismer'. The signature is written in a cursive, flowing style.
