Description: 2.4 GHz RFID Reader
Re: Class 2 permissive change: Addition of new external AC-DC power supply

To whom it may concern,
On behalf of my client, Hitachi America Ltd, I am applying for a class 2 permissive change for the referenced device. The only change to the product is the addition of a new external AC-DC power supply, which replaces the previously tested and now obsolete power supply. No changes have been made to any part of the radio circuitry, housing, or antenna system.

If you have questions please contact the undersigned.

Sincerely,

THOMAS N. COKENIAS
EMC Consultant/Agent for Hitachi America Ltd.
