Hi Tim,

Based on your last comment, please find our replies as follows:

1. The 731 form have been modified and revised per your comment, please find the one uploaded by this reply.
2. Please find the Block diagram revised per your comment. FYI, this one is captured from the Operational description per your last comment.
3. In order to show the RF module doesn't made by the grantee, please find the additional RF module schematics by this reply. FYI, the RF module is made by the Gemtek instead of the FIC.
4. The grantee only opens the appropriate channels according to the countries regulation which to be selling. For the devices marketing the US, it only opens the CH1-11 (2402-2462MHz) and no option for the end-user for choosing their operating channel instead., FYI.
5. The application will have DoC (will be tested and reported by our Taiwan facilities which has been accredited) and the Certification part is being certified by this.
6. The user manual have been modified, please find the exhibit submitted by this reply.
7. Please find the exhibit (additional information) submitted by this reply regarding to this comment.
8. Please find the exhibit (RF exposure info) submitted by this reply regarding to this comment. The MPE has been prepared separately.
- 9~11. Please find the test report submitted by this reply.
12. The user manual have been modified, please find the exhibit submitted by this reply.
13. Okay, I have informed the applicant for this, thanks!!
