Applicant: Mitsumi Electric Co Ltd

To Whom It May Concern:

This is to request a Class II permissive change for FCC ID: EW4DWMW314, originally granted on 11/30/2014.

We granted full modular approval without SAR testing as mobile use. However, this module will be used in specific portable host devices, therefore we performed the SAR testing with host device, confirmed that this product still meets the minimum requirements of the applicable rules of FCC DTS. Please refer to the test report submitted with this application.

For DSS, this module is exempt from RF exposure SAR evaluation as its output power meets the exclusion limits stated in KDB 447498 D01 General RF Exposure Guidance v5. Please refer to the SAR Test Report.

Meanwhile we submit the following documents related to this change. There is no change before and after change except for these documents.
