VM3252 VM3252-2 Video Baby Monitor

vtech Quick start guide

Power requirements	Parent unit: 3.0V, 300mAh Li-Ion, 9.36Wh Li-Ion battery Baby unit power adapter: Output: 6V DC, 0.55Amp
Normal effective range	Maximum power received by FCC and IC Actual operating range may vary according to environmental conditions at the time of test.
LCD	7" TFT Color LCD (2048x1536 pixels)
Channels	32
Transmit frequency	Baby unit: 2.405 - 2.425 MHz
Frequency control	CPSK with controlled PLL synthesizer

TECHNICAL SPECIFICATIONS

IMPORTANT SAFETY INSTRUCTIONS

- The applied nameplate is located at the bottom of the baby unit. Basic safety precautions which apply to all electrical equipment. Read and understand all instructions, electric shock and injury, including the following:
- Follow all warnings and instructions marked on the product.
 - Do not touch the baby unit at a height above the reach of the child.
 - CAUTION:** Do not treat the baby unit as a height above the reach of the child.
 - The product is not a substitute for adult supervision. The parent is responsible for the infant. The parent or caregiver's responsibility. This product could cease operating, and therefore you should not use it until continuous working proper for any given period of time. Further, this is not a medical device and should not be used as such. This product is intended to assist you in supervising your baby.
 - Do not use this product near water, for example, near a bath, sink, swimming pool or shower.
 - CAUTION:** Use only the battery provided. There may be a risk of explosion if a wrong type of battery is used for the parent unit. The battery cannot be subjected to high or low extreme temperature and low air pressure at high altitudes during its storage or transportation. Storage of battery to fire or a hot oven, mechanically crushing or cutting or the battery can result in an explosion, scalding the battery in an extremely high temperature surrounding environment can result in an explosion or the leakage of flammable liquid or gas. Children or adult batteries of flammable liquid or gas. Children or adult batteries of flammable liquid or gas. Children or adult batteries according to the information in **The RRBC test**.
 - Use only the power adapters included with this product. Incorrect power adapter polarity or voltage can seriously damage the product.
- SAVE THESE INSTRUCTIONS**
- Use and store the product at a temperature between 32°F and 104°F.
 - Do not expose the product to extreme cold, heat or direct sunlight. Do not put the product close to a heating source.
 - Batteries should not be exposed to excessive heat such as bright sunshine or fire.
 - Warning - Strangulation Hazard - Children have STRANGLED to death. Keep this cord out of the reach of children (more than 18 inches away). Do not remove warning labels on the baby unit or parent unit or anything such as a towel or blanket.
 - Never place the baby unit or parent unit near a fire.
 - Other electronic products may cause interference with your baby monitor. Try installing your baby monitor as far away from other electronic devices as possible: wireless routers, radios, cellular telephones, intercoms, room monitors, televisions, personal computers, kitchen appliances and cordless telephones.
- Precautions for users of implanted cardiac pacemakers**
Cardiac pacemakers (applies only to digital cordless devices): Wireless Technology Research, LLC (WTR), an independent research entity, led a multicenter study of the interference between portable wireless devices and implanted cardiac pacemakers. Supported by the U.S. Food and Drug Administration, WTR recommends the following:
- Pacemaker patients**
 - Should keep wireless devices at least six inches from the pacemaker.
 - Should NOT place wireless devices directly over the pacemaker, such as in a breast pocket, when it is turned ON.
 - WTR's evaluation does not identify any risk to bystanders from pacemakers from other persons using wireless devices.
 - Electromagnetic Interference (EMI)**
This VTech product complies with all standards regarding electromagnetic interference (EMI). If handled properly and according to the instructions in this user manual, the product is safe to use based on scientific evidence available today.

WHAT'S IN THE BOX

1 CONNECT THE BABY MONITOR

- NOTES**
- The rechargeable battery in the parent unit is built-in.
 - Use only the power adapters supplied with this product.
 - Make sure the baby monitor is not connected to a switch-controlled electric outlet.
 - Connect the power adapters in a vertical or floor mount position only. The adapters' prongs are designed to hold the weight of a baby monitor, so do not connect them to any ceiling, under-the-table, or cabinet outlets. Otherwise, the adapters may not properly connect to the outlets.
 - Make sure the parent unit, the baby units and the power adapter cords are out of reach of children.
 - To maintain compliance with the FCC's RF Exposure guidelines, place the baby unit at least 20cm from nearby persons.

2 POWER ON OR OFF THE BABY MONITOR

- Baby Unit turns on automatically after it connects to the power socket. Disconnect from the power supply to power off.
- Press and hold **POWER** to power your parent unit on or off.

1 CONNECT THE BABY MONITOR (CONT'D)

Charge the parent unit battery

When you have connected and turned on the parent unit, the battery will be charged automatically.

NOTES

- Before using the baby monitor for the first time, charge the parent unit battery for 12 hours. When the parent unit battery is fully charged, the battery icon becomes solid.
- It takes longer to charge the battery when the parent unit is turned on. To shorten the charging time, turn the parent unit off while charging.
- The standby time varies depending on the sensitivity level you set, your actual use and the age of the battery.

The battery icon indicates the battery status (see the following table).

BATTERY INDICATORS	BATTERY STATUS	ACTION
The screen displays a battery icon with a red light flash.	The battery has very little charge and may be used for only a short time.	Charge without interruption (about 30 minutes).
The battery icon becomes solid.	The battery is fully charged.	To keep the battery charged, connect it to AC power when in use.

3 POSITIONING THE BABY MONITOR

CAUTION

- Keep the baby unit out of the reach of your baby. Never place or mount the baby unit inside the baby's crib or playpen.

CAUTION

- The default volume of your parent unit is level 3, and the maximum volume is level 5. If you experience feedback noise from your baby monitor while positioning:
 - Make sure your baby unit and parent unit are more than 3 feet (1 meter) apart, OR
 - Turn down the volume of your parent unit.

NOTE

- To avoid interference from other electronic devices, place your baby monitor at least 1 meter (1 meter) away from devices such as wireless routers, microwaves, mobile phones and computers.

4 STATUS CHECK

Once you power on both your baby unit and parent unit, your parent unit displays images from the baby unit, and the **LINK** LED light turns on.

The baby unit **POWER LED** light turns on.

BASIC OPERATION - PARENT UNIT

Use the menu

Press **MENU** to enter the menu, or save a setting. You can use the parent unit for advanced settings or operations, such as to play or stop the baby unit's lullaby, or to adjust the baby unit's sound sensitivity.

While in the menu:

- Press **Left** or **Right** to scroll among the menu options.
- Press **SELECT** or **OK** to enter the desired submenu.
- Press **Left** or **Right** to select an item.
- Press **SELECT** to confirm your selection.
- Press **Left** or **Right** to exit the submenu.

Adjust parent unit speaker volume

Pressing **VOX+ / VOL+** adjusts the parent unit speaker volume level received from the baby unit.

Zoom

Press **VOX- / VOL-** to zoom in or out.

Talk to your baby unit

Press and hold **TALK** and speak to your parent unit. Your voice is transmitted to the baby unit. Release **TALK** when done talking to hear your baby again.

Turn off the screen

Press **OFF**.

OR

Press **LCD ON/OFF** (VM3252);
Press and hold **LCD ON/OFF** (VM3252-2) to switch off the screen.

You can still hear sound from the selected baby unit.

Tip

- Press any key on the parent unit to turn on the screen again.

OVERVIEW - PARENT UNIT

1 LINK LED light	6 GAM/LCD ON/OFF	12 Power jack
On when the parent unit is linked to the baby unit.	7 Arrow keys	13 Speaker
Flashes when the link to the baby unit is lost.	8 Microphone	14 VOX+ / VOL-
	9 MENU/SELECT	15 RESET
2 Battery LED light	10 Power on/off	
Mute LED light		
3 TALK LED light	11 TALK	
4 Zoom / VOX- Back		

OVERVIEW - BABY UNIT

3 Infrared LEDs	7 Power jack
4 Light sensor	8 Slots for wall mounting

NEED HELP?

For operations and guides to help you using your video monitor, and for latest information and supports, go and check the online help topics and online FAQs.

Use your smartphone or mobile device to access our online help.

- Go to <https://help.vtechphones.com> or <https://help.vtechphones.com/vm3252-2>, OR
- Scan the QR code on the right. Launch the camera app or QR code scanner app on your smartphone or tablet. Hold the device's camera up to the QR code and frame it. Tap the notification to trigger the redirection of the online help.
- If the QR code is not clearly displayed, adjust your camera's focus by moving your device closer or further away until it is clear.

You can also call our Customer Support at 1 (800) 595-9511 (in US) or 1 (800) 267-7377 (in Canada) for help.

PARENT UNIT ICONS

Status icons

- Full or Half** displays when strong signal strength is detected between the baby unit and the parent unit.
- Yo or Yc** displays when moderate or low signal strength is detected between the baby unit and the parent unit.
- Patrol mode**
 - Displays when the parent unit is in **PATROL** mode (For VM3252-2 only).
- Current view status**
 - Displays the baby number of the baby unit that is being viewed.
- Zoom**
 - Displays when the current image on the parent unit has zoomed in.
- Night vision**
 - Displays when the baby unit being viewed has activated the night vision feature.
- Talkback**
 - Displays when talking back to the baby units from parent unit.
- Lullaby**
 - Displays when a lullaby is playing.
- Mute alert**
 - Displays when the parent unit speaker volume is set to zero.
 - Displays when the parent unit is talking to the baby unit.
- Real-time temperature**
 - Displays the real-time temperature detected by the baby unit in Fahrenheit (°F) or Celsius (°C) (e.g. 57°F or 14°C).
- Battery status**
 - displays solid when the battery is fully charged.
 - displays when the battery is low and needs charging.

Main menu icons

- Brightness**
 - Adjust the parent unit's LCD screen brightness level.
- Screen off timer**
 - Turn on/off screen off timer.
 - Conserves energy after your chosen amount of time of inactivity.
- Temperature**
 - Turn on/off temperature alert tone.
 - Set the parent unit to beep whenever the room temperature detected by the baby unit falls outside of the set temperature range.
- VOX (Voice Activated Alert) Sensitivity**
 - You can choose to hear sounds from the baby unit all the time, or to only hear sounds that exceed a certain level. Adjust the microphone sensitivity of your baby unit, the higher the sensitivity level, the more sensitive the baby unit is in detecting sounds to be transmitted to the parent unit. See **Sound sensitivity and sound activation** section.
- Sound Detection**
 - ON** **Sound-activated screen**
 - When it is on, and the baby unit detects no sound, the parent unit screen stays off to save power. Once a sound is detected, the parent unit screen and speaker turns on automatically, and you can see and hear your baby. The parent unit will then turn off again after 50 seconds of no sound detection.
 - NOTE**
 - When the parent unit screen is off and it receives alerts, for example, link lost between parent unit and baby unit, or battery is low, the parent unit screen and speaker will turn on.

PARENT UNIT ICONS (CONT'D)

Main menu icons

- Link** - Lullaby volume
- Temperature too high** - Adjust the baby unit's speaker volume when playing the lullaby.
- Temperature too low** - Select one of the four melodies to play, or stop a lullaby.

Parent Unit Indication Lights

LINK

- On when the parent unit is linked to the baby unit.
- Flashes when the link to the baby unit being viewed is lost.
- On when the parent unit is connected to AC power, or the battery is charging.
- Flashes when the parent unit battery is low and needs charging.
- Off when the parent unit is disconnected from AC power.

LINK

- On when the parent unit speaker volume is set to zero.
- On when the parent unit is talking to the baby unit.
- On when the parent unit is talking to the baby unit.

Monitoring Mode (For VM3252-2 only)

Patrol mode

- Monitor your baby in **PATROL** mode, where the screen will cycle through display views streamed from all of the linked baby units (For VM3252-2 only).

Warning icons and messages

Battery low at Parent Unit

- The battery is empty and needs to be recharged.
- Operation is in progress.

Temperature too high

- The temperature detected by the baby unit is higher than the desired temperature alert range.

Temperature too low

- The temperature detected by the baby unit is lower than the desired temperature alert range.

No Link to Camera

- The parent unit is searching for baby units or the link between the baby unit and the parent unit is lost.
- The parent unit is connected to AC power.

SOUND SENSITIVITY AND SOUND ACTIVATION

Adjust the sound sensitivity of the baby unit

You can choose to hear sounds from the baby unit all the time, or to hear sounds that exceeds the sound sensitivity setting. You can use the parent unit to adjust the microphone sensitivity of your baby unit. The higher the sensitivity level, the more sensitive the baby unit is in detecting sounds that transmit to the parent unit. The VOX sensitivity level is preset to the highest level.

VOX SENSITIVITY LEVEL	Highest	High	Medium	Low	Lowest
DESCRIPTION	The parent unit speaker is constantly on, and you will hear all sounds (including background noises) from your baby's room.	The parent unit speaker turns on for soft babbling and louder sounds from your baby. It remains quiet when your baby sleeps soundly.	The parent unit speaker turns on for loud babbling and louder sounds from your baby. It remains quiet when your baby makes soft sounds.	The parent unit speaker turns on for crying or loud sounds from your baby. It remains quiet when your baby makes soft sounds.	The parent unit speaker turns on for loud crying or screaming sounds from your baby. It remains quiet when your baby makes soft sounds.

Sound activated screen

When sound activation is on, the parent unit screen remains off to save power when the baby unit detects no sound. Once the baby unit detects sounds that are louder than the chosen sound sensitivity level, the parent unit screen turns on automatically. It will then turn off again after 50 seconds of no sound detection.

DIM MODE

The dim mode is to help you save the parent unit power. Your parent unit display will dim automatically after 10 minutes of inactivity, when no keys are pressed or alerts are received from the baby unit.

Press any buttons

NIGHT VISION

The baby unit has infrared LEDs that allow you to see your baby clearly at night or in a dark room. When the baby unit being viewed detects low light levels, the infrared LEDs are switched on automatically. The images from the baby unit are in black and white, and appear on the screen.

NOTES

- It is normal to see a short white glare on your parent unit screen as the baby unit adapts to the dark environment.
- When the infrared LEDs are on, the images are in black and white. This is normal.
- Depending on the surroundings and other interfering factors, like lighting, objects, colors and backgrounds, the display resolution may vary. Adjust the baby unit angle or place the baby unit at a higher level to prevent glare and a blurry display.

FOR VM3252-2 ONLY

Status check - Two baby units

If you are viewing baby unit 1, the **POWER LED** light of baby unit 1 turns on. As baby unit 2 is not being viewed, its **POWER LED** light flashes.

NOTE

- If you power on only one baby unit, your parent unit may display the **LINK LED** light will flash. Press **LINK** to switch to the baby unit you have powered on.

Change different views - Patrol

- Press **MENU** when the parent unit is idle.
- Press **▶** or **◀** to choose **1**, then press **SELECT** or **▲**.
- Press **▼** or **◀** to choose **2**, then press **SELECT** to confirm your selection.

Change different views - Single-cam

Press **CAM** to switch to another camera in **SINGLE-CAM** mode.

MOUNT THE BABY UNIT ON DRY WALL (OPTIONAL)

Items to purchase

You will need to purchase the following items separately to mount your baby unit:

- 2 screws
- 2 anchors

NOTE

- The types of screws and anchors you need depend on the composition of the wall.

- Insert the screws into the holes and tighten the screws until only 1/4 inch of the screws are exposed.
- Align the wall mount holes on the wall. Slide the baby unit down until it locks into place.
- Adjust the baby unit angle.

FREQUENTLY ASKED QUESTIONS

Below are the questions most frequently asked about the baby monitor.

Why does the baby monitor not respond normally?
Try the following (in the order listed) for common cause:
1. Disconnect the power to the baby units and the parent unit.
2. Wait a few seconds before connecting power back to the baby units and the parent unit.
3. Turn on the baby units and the parent unit.
4. Wait for the parent unit to synchronize with the baby units. Allow up to one minute for this to take place.

Why doesn't the parent unit and parent unit power on light illuminate when the units are switched on?
Perhaps the parent unit is not connected to the power. Insert the appliance plug into the parent unit and insert the adapter in a wall socket. Then, press and hold **POWER** to switch on the parent unit and to establish connection with the baby unit.
Perhaps the baby unit is not connected to the power. Insert the appliance plug into the baby unit and insert the adapter in a wall socket. Then, establish a connection with the parent unit.

Why doesn't my parent unit charge while connected to AC power?
Make sure the power is not controlled by electronic wall switch.
You may use the battery for a long time. See **Repair/replace**.

Why is my screen in black and white?
The screen is in black and white during night-time or in a dark room when the night vision feature is activated. This is normal.

Why do I get glare or blurry display on my screen when I view my baby at night?
During night-time in a dark room, the surroundings and other interfering factors, like lightings, objects, colors and backgrounds may affect the image quality on your screen until the parent unit adapts to the dark environment. You may adjust the baby unit angle or place the baby unit at a higher level to prevent glare and a blurry display.

Why does the baby monitor produce a feedback noise?
The parent unit and baby units may be too close to each other.
Move the parent unit away from the baby units until the battery icon becomes solid.
Turn down the volume of your parent unit.

Why does the parent unit beep?
The battery units may be out of range. Move the parent unit closer to the baby units (but not less than 3 feet).

THE RBRC SEAL

The RBRC seal on the Li-ion battery indicates that Vtech Communications, Inc. is voluntarily participating in an industry program to collect and recycle those batteries at the end of their useful lives, when taken out of use within the United States and Canada.

The program provides a convenient alternative to placing used Li-ion batteries into the trash or municipal waste, which may be illegal in your area.

Vtech's participation makes it easy for you to drop off the spent battery at local retailers participating in the program or at an authorized Vtech product service center. Please call **(800) 8 BATTERY** for information on Li-ion battery recycling and disposal restrictions in your area. Vtech's involvement in this program is part of its commitment to protecting our environment and conserving natural resources.

The RBRC seal and (800) 8 BATTERY are registered trademarks of Call2Recycle, Inc.

FCC Part 15

This equipment has been tested and found to comply with the requirements for a Class B digital device under Part 15 of the Federal Communications Commission (FCC) rules. These requirements are intended to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

WARNING: Changes or modifications to this equipment not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

To see a copy of the FCC's established criteria for the amount of radio frequency energy that can be safely absorbed by a user or bystander according to the intended usage of the product, this product has been tested and found to comply with the FCC rules. The baby unit shall be installed and used such that parts of all persons' body are maintained at a distance of approximately 8 in (20 cm) or more. The transmitter and antenna of the parent unit shall be held at least 1 in (2.5 cm) from your body.

This Class B digital apparatus complies with Canadian requirements: **CAN ICES 3 (B)/NMB-3(B)**

FOR CETL COMPLIANCE ONLY

LIMITED WARRANTY

What does this limited warranty cover?

The manufacturer of this Vtech Product warrants to the holder of a valid proof of purchase "Consumer" or "you" that the Product and all accessories provided in the sales package ("Product") are free from defects in material and workmanship, pursuant to the following terms and conditions, when installed and used normally and in accordance with the Product operating instructions. This limited warranty extends only to the Consumer for Products purchased and used in the United States of America and Canada.

What will Vtech do if the Product is not free from defects in materials and workmanship during the limited warranty period ("Materially Defective Product")?

During the limited warranty period, Vtech authorized service representative will repair or replace an Vtech option without charge, a Materially Defective Product. If we repair the Product, we may use new or refurbished replacement parts. If we choose to replace the Product, we may replace it with a new or refurbished Product of the same or similar design. We will retain defective parts, modules, or equipment. Repair or replacement of the Product, at Vtech's option, is an exclusive remedy. Vtech will return the repaired or replacement Product to you if you working condition. You should expect the repair or replacement to take approximately 30 days.

How long is the limited warranty period?

This limited warranty period for the Product extends for **ONE (1) YEAR** from the date of purchase. If Vtech repairs or replaces a Materially Defective Product under the terms of this limited warranty, this limited warranty also applies to the repaired or replacement Product for a period of either (a) 90 days from the date the repaired or replacement Product is shipped to you or (b) the time remaining on the original one-year warranty, whichever is longer.

What is not covered by this limited warranty?

This limited warranty does not cover:

- Product that has been subjected to misuse, accident, shipping or other physical damage, improper installation, or modification by anyone other than an authorized service representative of Vtech or;
- Product whose warranty quality stickers, product serial number, parts or electronic serial numbers have been removed, altered or rendered illegible;
- Product purchased, used, serviced, or shipped for repair from outside the United States of America or Canada; or
- Product whose warranty quality stickers, product serial number, parts or electronic serial numbers have been removed, altered or rendered illegible;
- Product returned without a valid proof of purchase (see item 2 below); or
- Changes to installation or set up, adjustment of customer controls, and installation or repair of parts outside the unit.

DISCLAIMER AND LIMITATION OF LIABILITY

Vtech Communications, Inc. and its suppliers assume no responsibility for any damage to loss resulting from the use of this user's manual. Vtech Communications, Inc. and its suppliers assume no responsibility for any damage to loss resulting from the use of this product.

CABLE MANAGEMENT

CALIFORNIA ENERGY COMMISSION BATTERY CHARGING TESTING MODE

This baby monitor meets the California Energy Commission (CEC) regulations for energy consumption. Your baby monitor is set up to comply with the energy-conserving standards right out of the box. Follow the instructions to install and charge the batteries. The CEC battery charging testing mode is activated while charging. Even if the parent unit is paired to baby units, the CEC battery charging testing mode is activated while it is powered off and charging.

INDUSTRY CANADA

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference received, including interference that may cause undesired operation of the device.

The term "IC" before the certification/registration number only signifies that the Industry Canada technical specifications were met.

This product meets the applicable Innovation, Science and Economic Development Canada technical specifications.

RF radiation exposure statement

The baby unit complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. The baby unit should be used so that the distance between the baby unit and the parent's body (use of other accessories may not ensure compliance with FCC RF exposure guidelines). This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter. This equipment complies with Industry Canada RSS-320W respect to Canada's Health Code 6 for Exposure of Humans to RF Fields.

AVIS AUX DÉTENTEURS DE SIMILAIRES CALÉDONIENS
