sensitivity of your haby unit

™Note

When the parent unit screen is off and it receives alerts, for example, link lost between parent unit and baby unit, or battery is low, the parent unit screen and speaker will turn on for 10 seconds.

Sound sensitivity and sound activation

Adjust the sound sensitivity of the baby unit

Highest	High	Medium	Low	Lowest •
The parent unit speaker is constantly on, and you will hear all sounds (including background noises) from your baby's room.	The parent unit speaker turns on for soft babbling and louder sounds from your baby. It remains quiet when your baby sleeps soundly.	The parent unit speaker turns on for loud babbling and louder sounds from your baby. It remains quiet when your baby makes soft sounds.	The parent unit speaker turns on for crying and louder sounds from your baby. It remains quiet when your baby makes soft sounds.	The parent unit speaker turns on for loud crying or screeching sounds from your baby. It remains quiet when your baby makes soft sounds.

Sound activated screen

When sound activation is on, the parent unit screen stays off to save power when the baby unit detects no sound. Once the baby unit detects sounds that are louder than the chosen sound sensitivity level, the parent unit screen turns on automatically. It will then turn off again after 50 econds of no sound detection

The dim mode is to help you save the parent unit power. Your parent unit display will dim automatically after 10 minutes of inactivity, in which there is neither key pressed nor alert received from the baby unit.

While the screen is dimmed, any keypress or alert message will trigger the screen to return to the preset brightness level. After 10 minutes of inactivity, it will resume to dim mode.

NIGHT VISION

The baby unit has infrared LEDs that allow you to see your baby clearly at night or in a dark room. When the baby unit being viewed detects low light levels, the infrared LEDs are switched on automatically. The images from the baby unit are in black and white, and appears on the screen.

- IN NOTES

 It is normal to see a short white glare on your parent unit screen as the baby unit is adapting to the dark environment.

 When the infrared LEDs are on, the images are in black and white. This is normal.
- SS TIP
- Depending on the surroundings and other interfering factors, like lightings, objects, colors and backgrounds, the display resolution may vary. Adjust the baby unit's angle or place the baby unit at a higher level to prevent glare and blurry display.

FOR VM819-2 ONLY

Status check - Two baby units

If you are viewing baby unit $\,^{\circ}_{2}$ 1, the **POWER** LED light of baby unit $\,^{\circ}_{2}$ 1 turns on. As baby unit $\,^{\circ}_{2}$ 2 is not being viewed, its **POWER** LED light flashes.

₽Note If you power on only one baby unit, your parent unit may display To and the LINK LED light will flash

Change different views - Patrol

1. Press MENU when the parent unit is idle.

2 Press d or b to choose 🗐

Press ▼ or ▲ to choose ¹/₂, then press SELECT to confirm your selection.

Change different views - Single-cam

- 1. Press MENU when the parent unit is idle.
- 2 Press ◀ or ▶ to choose □

MOUNT THE BABY UNIT ON DRY WALL (OPTIONAL)

Drill two holes in the wall (7/23 inch drill bit) If you drill the holes into a stud, go to step 3,

If you drill the holes into an object other than a stud, insert the wall anchors into the holes. Tap gently on the ends with a hammer until the wall anchors are flush with the wall.

$^{\mathrm{Q}_{_{\!\delta_{\!\Lambda}}}}$ Frequently asked questions

Why don't the

baby at night?

Why does the baby monitor produce a high-pitched noise?

Try the following (in the order listed) for common care:

1 Disconsect the power to the baby units and the parent unit.

2 Uses now section below connecting power bab, to the baby units and the parent unit.

3 Lim on the baby units and the parent unit.

4 Lim on the baby units and the parent unit.

4 What for the parent unit to syndronize with the baby units. Allow up to one minute factor that the parent units units to the parent units units the darkgrin in wall work the thing parent units units of the darkgrin in wall work the thing parent units units of the darkgrin in value does the thing parent units units of the darkgrin in value does the thing parent units units of the darkgrin in value does the thing parent units units the darkgrin in value does the thing parent units units the darkgrin in value does the thing parent units units the darkgrin in value does the thing parent units units the darkgrin value units the baby units. Perhaps the baby unit is not connected to the power. Insert the appliance plug into the baby unit and put the adapter in a wall socket. Then, slide the OON/OFF switch to ON to switch on the baby unit and to establish connection with the parent unit.

The screen is in black and white during night-time or in a dark room when the night vision feature is activated. This is normal.

During night-time or in a dark room, the surroundings and other interfering factors, like lightings, objects, colors and backgrounds may affect the image quality on your parent unit screen. Adjust the baby unit's angle or place the baby unit at a higher level parent unit screen. Adjust the baby unit's angle or place the baby unit at a his prevent glare and blurry display.

The parent unit and baby units may be too close to each other.

Move the parent unit away from the baby units unit the noise stops; OR

Turn down the volume of your parent unit.

The baby units may be out of range. Move the parent unit closer to the baby units (but not less than 3 feet).

The temperature of your baby's room may be too high or too low.

The parent unit speaker volume may be too low. See Adjust parent unit speaker volume to increase the volume.

You may have set a low VCX sensitivity level. See Adjust the sound sensitivity of the baby unit to set to a higher level. The baby units may be out of range. Move the parent unit closer to the baby units (but

not less than 3 feet).

If you power on only one baby unit, your parent unit may display \overline{Y}_{8} , and the LINK LED light will flash.

THE RBRC SEAL

The RBRC seal on the Li-lon battery indicates that VTech Communications, Inc. is voluntarily participating in an industry program to collect and recycle these batteries at the end of their useful lives, when taken out of service within the Purked States and Canada.

The program provides a convenient alternative to placing used Li-lon batteries into the trash or municipal waste, which may be filligal in your active.

VTech's participation makes it easy for you to drop of the spent battery at local retailers participating in the program of the participation of the program of the program
