Dear Sir / Madam:

**Re: Application for a Class II Permissive Change filing with FCC ID:**

**Base: EW780-5656-00**

**Handset: EW780-5656-01**

The purpose of this document is to describe the change on the RF circuitry that is made to the VTech designed model, Vtech mi6866. Change is made to improve the performance of the phone.

**The changes on the RF modules (Handset & Base) from the current approved version to the new version are :**

- 2-layer PCB was used instead of 4-layer PCB
- RF Transceiver IC (HS – U1; BS – U2) is changed to die form
- single piece shield can is used rather than cover and frame

All other circuitry & RF IC remain the same.

Sincerely,

Joseph Poon  
Regulatory Compliance Manager
