Dear Sir / Madam:

Re: Application for a Class II Permissive Change filing with FCC ID:

Base: EW780-5735-00

The purpose of this document is to describe the change on the RF circuitry that is made to the VTech designed model, Vtech ia5854 (Base only). Change is made to improve the performance of the phone.

The only change on RF circuitry from the current approved version to the new version is :

The existing single dual band antenna is replaced by two separate monopole wire antennas; one for the 900MHz TX and another for 5.8GHz RX. There is no 5.8GHz Rx diversity antenna on the base.

All other circuitry & RF IC remain the same.

Sincerely,

A handwritten signature in black ink, appearing to read "Joseph Poon".
