IMPORTANT SAFETY INSTRUCTIONS

When using your telephone equipment, basic safety precautions should always be followed to reduce the risk of fire, electric shock and injury, including the following:

- 1. Read and understand all instructions 2. Follow all warnings and instructions marked on the product.
- 3. Unplug this product from the wall outlet before cleaning. Do not use liquid or aerosol cleaners. Use a damp cloth for cleaning.
- 4. CAUTION: Do not install the telephone base at a height above 2 meters.
- 5. Do not use this product near water such as near a bath tub wash bowl, kitchen sink, laundry tub or a swimming pool
- 6. Do not place this product on an unstable table, shelf stand or other unstable surfaces.
- 7. Avoid placing the telephone system in places with extreme temperature, direct sunlight, or other electrical devices. Protect your phone from moisture, dust, corrosive liquids and fumes.
- 8. Slots and openings in the back or bottom of the telephone base and handset are provided for ventilation. To protect m from overheating, these openings must not be blocked by placing the product on a soft surface such as a bed, sofa or rug. This product should never be placed near or over a radiator or heat register. This product should not be placed in any area where proper ventilation is not provided.
- 9. This product should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supply in your home or office, consult your dealer or local power company.
- 10. Do not allow anything to rest on the power cord. Do not install this product where the cord may be walked on.
- 11. Never push objects of any kind into this product through the slots in the telephone base or handset because they may touch dangerous voltage points or create a short circuit. Never spill liquid of any kind on the product.
- 12. To reduce the risk of electric shock, do not disassemble his product, but take it to an authorized service facility. Opening or removing parts of the telephone base or handset other than specified access doors may expose you to dangerous voltages or other risks. Incorrect eassembling can cause electric shock when the produc is subsequently used.
- 13. Do not overload wall outlets and extension cords.
- 14. Unplug this product from the wall outlet and refer servicing to an authorized service facility under the following conditions:
- When the power supply cord or plug is damaged
- If liquid has been spilled onto the product. If the product has been exposed to rain or water
- · If the product does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operation instructions. Improper adjustment of other controls may result in damage and often requires extensive work by an authorized technician to restore the product to normal operation.
- If the product has been dropped and the telephone
- base and/or handset has been damaged. If the product exhibits a distinct change in performance.

15. Avoid using a telephone (other than cordless) during an electrical storm. There is a remote risk of electric shock from lightning.

- 16. Do not use the telephone to report a gas leak in the vicinity of the leak. Under certain circumstances, a spark may be created when the adapter is plugged into the power outlet, or when the handset is replaced in its cradle. This is a common event associated with the closing of any electrical circuit. The user should not plug the phone into a power outlet, and should not put a charged handset into the cradle, if the phone is located in an environment containing concentrations of flammable or flame-supporting gases, unless there is adequate ventilation. A spark in such an environment could create a fire or explosion. Such environments might include: medical use of oxygen without adequate ventilation; industrial gases (cleaning solvents; gasoline vapors; etc.); a leak of natural gas; etc.
- 17. Only put the handset of your telephone next to your ear when it is in normal talk mode
- 18. The power adapter is intended to be correctly oriented in a vertical or floor mount position. The prongs are not designed to hold the plug in place if it is plugged into a ceiling, under-the-table or cabinet outlet.
- 19. For pluggable equipment, the socket-outlet shall be installed near the equipment and shall be easily
- CAUTION: Use only the batteries indicated n this manual. There may be a risk of explosion if a wrong type of battery is used for the handset. Use only the supplied rechargeable batteries or replacement batteries (BT162342/BT262342) for the handset. Do not dispose of batteries in a fire. They may explode. Disposed of used batteries according to the
- Do not use the battery in following conditions High or low extreme temperature during use, storage or transportation.
- Replacement of a battery with an incorrect type that can defeat a safeguard.
- » Disposal of a battery into fire or a hot oven, or
- mechanically crushing or cutting of a battery, that can result in an explosion » Leaving a battery in an extremely high temperature surrounding environment that can result in an explosion or the leakage of flammable
- liquid or gas » A battery subjected to extremely low air pressure that can result in an explosion or the leakage of
- lammable liquid or gas. 21. Use only the adapter included with this product. ncorrect adapter polarity or voltage can seriously
- 22. The applied nameplate is located at the bottom or near of the product. SAVE THESE INSTRUCTIONS

damage the product.

- Use only the battery provided or equivalent. To order a replacement, visit our website at www.vtechphones.com or call 1 (800) 595-9511. In Canada, go to phones, vtech canada, com or call
- Do not dispose of the battery in a fire. Check with local waste management codes for special disposal instructions.

Do not open or mutilate the battery. Released electrolyte is corrosive and may cause burns or injury to the eyes or skin. The electrolyte may be toxic if

- Exercise care in handling batteries in order not to create a short circuit with conductive materials.
- Charge the battery provided with this product only in accordance with the instructions and limitations specified in this manual.

Precautions for users of implanted cardiac pacemakers Cardiac pacemakers (applies only to digital cordless

Wireless Technology Research, LLC (WTR), an independent research entity, led a multidisciplinary evaluation of the interference between portable wireless telephones and implanted cardiac pacemakers. Supported by the U.S. Food and Drug Administration, WTR recommends to physicians

Pacemaker patients

- Should keep wireless telephones at least six inches from the pacemaker.
- Should NOT place wireless telephones directly over the pacemaker, such as in a breast pocket, when it is
- Should use the wireless telephone at the ear opposite the pacemaker. WTR's evaluation did not identify any risk to bystanders with pacemakers from other persons using wireless telephones

ABOUT CORDLESS TELEPHONES

- **Privacy:** The same features that make a cordless telephone convenient create some limitations. Telephone calls are transmitted between the telephone base and the cordless handset by radio waves, so there is a possibility that the cordless telephone conversations could be intercepted by radio receiving equipment within range of the cordless handset. For this reason, you should not think of cordless telephone conversations as being as private as those on corded telephones.
- Electrical power: The telephone base of this cordless telephone must be connected to a working electrical outlet. The electrical outlet should not be controlled by a wall switch. Calls cannot be made from the cordless handset if the telephone base is unplugged, switched off or if the electrical power is interrupted.
- Potential TV interference: Some cordless telephones operate at frequencies that may cause interference to televisions and VCRs. To minimize or prevent such interference, do not place the telephone base of the cordless telephone near or on top of a TV or VCR. If interference is experienced, moving the cordless telephone farther away from the TV or VCR often reduces or eliminates the interference.
- Rechargeable batteries: Exercise care in handling batteries in order not to create a short circuit with conducting material such as rings, bracelets and keys. The battery or conductor may overheat and cause harm Observe proper polarity between the battery and the battery charger.
- Nickel-metal hydride rechargeable batteries: Dispose of these batteries in a safe manner. Do not burn or puncture the battery. Like other batteries of this type, if burned or punctured, they could release caustic material which could cause injury.

- TELEPHONE SERVICE
- Voicemail is a feature available from most telephone service providers. It may be included with your telephone service, or may be optional.

RETRIEVE VOICEMAIL FROM

Retrieve voicemail

Fees may apply.

When you received a voicemail, the handset displays and New voicemail. To retrieve, you typically dial an access number provided by your telephone service provider, and then enter a security code. Contact your telephone service provider for instructions on how to configure the voicemail settings and listen to messages.

NOTE: After you have listened to all new voicemail messages, the indicators on the handset turn off automatically.

Set your voicemail number You can save your access number on each handset

for easy access to your voicemail. After you saved the voicemail number, you can press and hold **1** to retrieve voicemail

- 1. Press **MENU** when the phone is not in use. 2. Scroll to **Settings** and then press **SELECT**.
- 3. Scroll to Voicemail # and then press SELECT.
- 4. Use the dialing keys to enter the voicemail number (up to 30 digits).
- 5. Press **SELECT** to save.

Clear the new voicemail indicators If you have retrieved your voicemail while away

from home, and the handset still displays the new voicemail indicators, use this feature to clear the

only, it does not delete your voicemail messages 1. Press **MENU** when the phone is not in use.

NOTE: This feature clears the indicators

- 2. Scroll to **Settings** and then press **SELECT**.
- 3. Scroll to Clr voicemail and then press SELECT.
- 4. Press **SELECT** again to confirm. You hear a confirmation tone.

ECO MODE

This power conserving technology reduces power consumption for optimal battery performance. The ECO mode activates automatically whenever the handset is synchronized with the telephone base.

GENERAL PRODUCT CARE

Taking care of your telephone

Your cordless telephone contains sophisticated electronic parts, so it must be treated with care

Avoid rough treatment

Place the handset down gently. Save the original packing materials to protect your telephone if you ever need to ship it.

Avoid water

Your telephone can be damaged if it gets wet. Do not use the handset outdoors in the rain, or handle it with wet hands. Do not install the telephone base near a sink, bathtub or shower.

should retain its luster for many years. Clean it

Electrical storms

Electrical storms can sometimes cause power surges harmful to electronic equipment. For your own safety, take caution when using electrical appliances during storms

Cleaning your telephone Your telephone has a durable plastic casing that

only with a dry non-abrasive cloth. Do not use dampened cloth or cleaning solvents of any kind.

Les bloc-piles rechargeables à l'hydrure métallique de nickel

The RBRC seal on the nickel-metal hydride battery indicates that VTech Communications, Inc. is voluntarily participating in an industry ogram to collect and recycle these batteries at the end of their useful lives, when taken out of service within the United States and Canada.

FCC, ACTA and IC regulations

NOTE: This equipment has been tested and found to comply with the requirements for a Class B digital device under Part 15 of the Federal Communications Commission (FCC) rules. These requirements are intended to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or elevision reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Regrient or relocate the receiving antenna
- WARNING: Changes or modifications to this equipment not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any

riteria for the amount of radio frequency energy that can be safely absorbed by a user or bystander according to the approximately 20 cm (8 inches) or more. This Class B digital apparatus complies with Canadian

CAN ICES-3 (B)/NMB-3(B).

FCC Part 68 and ACTA

provider upon request

The RBRC program provides a convenient alternative to placing used nickel-metal hydride batteries into the trash or municipal waste, which may be illegal in your area. VTech's participation in RBRC makes it easy for you to drop off the spent battery at local retailers participating in the RBRC program or at authorized VTech product service centers. Please call **1 (800) 8 BATTERY®** for information on Ni-MH battery recycling and disposal bans/restrictions in your area. VTech's involvement in this program is part of its commitment to protecting our environment and conserving natural resources. The RBRC Seal and 1 (800) 8 BATTERY® are registered
