Subject: Re: FCC ID: EW79108

Hi Barry:

Below is our response to your questions:

1. There was no change in the fundamental emission level due to +/- 15% variation in supply voltage.
2. I have attached a pdf file containing the test setup photos.

I trust the above information is sufficient for you to complete this application.

Thanks,
Ruby

Hi Ruby,

We have identified the following issues following our review of the application:

1. Please supply evidence responsive to the 15.31(e) supply voltage variation requirements.
2. Please supply the test setup photos in a separate file.

Best regards

Barry C. Quinlan
