Subject: RE: Confidentiality Item

Hello

In this situation (the type of corrections being requested and the grant is over 30 days), the request for the corrections should be submitted as a Class II Permissive Change. A fee for the Permissive Change is required; a fee for confidentiality is not required because the confidentiality fee was paid under the original filing.

Thank you.

Subject: Confidentiality Item

Hi,

The grant for FCC ID: EZSDEI7701, was issued May 18, 2006. The test report has information attached to the end of it that should have been held confidential due to operating description information being included.

The following are attached:

- 1) New confidentiality letter listing this information EZSDEI7701 Part 15 INFO to be held confidential,
- 2) EZSDEI7701 Part 15 INFO document to be included under Operating Description
- 3) A new test report is attached without the information at the end.

If other action is needed to have these items replaced, please let me know as the client is anxious to have this information removed from the FCC website.

Regards,
Judy Evans
