Models: 6816T, TW150

Family letter

This letter explain that Directed are using different models (Viper/ Clifford Model 6816T and Autostart Model TW150) on this product.

All this models uses the same (PCB, HW/RF), the only change is that each model use different data to communicated with the brain system in the car and that the cases are cosmetically different. All the RF frames in the air are the same with same duty cycle and RF parameters.

Sincerely,

Minas Minassian
Sr. director, hw/rf systems
