USER MANUAL

26MAR2012REV.1.00

UNIPULSE

Structure

(WI500 Transmitter)

It mounts to the end products using a connector.

It is as follows when it mounting to representation model WI500 Transmitter.

WI500 Transmitter

The following labels are stuck on the apparatus mounted on this module.
It is as follows when it mounting to representation model WI500 Transmitter.

Contains FCC ID: F3OUPCR2356

s=1/1

This label is stuck on packing.

In this example, since it is so small that equipment cannot stick a label,
it displays on a package, but generally stick this label on equipment.

29mm x 17mm s=1/1

Federal Communications Commission (FCC)

The manual of the product which contains this module should include the following.

Information to user

FCC CAUTION

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Part 15 Subpart B

The manual of the product which contains this module should include the following (a) or (b).

(a) For a Class A digital device or peripheral, the instructions furnished the user shall include the following or similar statement, placed in a prominent location in the text of the manual:

Note:

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

(b) For a Class B digital device or peripheral, the instructions furnished the user shall include the following or similar statement, placed in a prominent location in the text of the manual:

Note:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Part 15 Subpart C

This transmitter must not be co-located or operated in conjunction with any other antenna or transmitter.

RF Exposure Compliance

The manual of the product which contains this module should include the following (a) or (b).

*mobile devices: designed to be generally used in such a way that a separation distance of at least 20 centimeters is normally maintained between the transmitter's radiating structures and the body of the user or nearby persons.

*portable devices: designed to be used with any part of its radiating structure in direct contact with the user's body or within 20 centimeters of the body of a user.

(a) for Mobile Devices

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment and meets the FCC radio frequency (RF) Exposure Guidelines in Supplement C to OET65. This equipment has very low levels of RF energy that it deemed to comply without maximum permissive exposure evaluation (MPE). But it is desirable that it should be installed and operated keeping the radiator at least 20cm or more away from person's body (excluding extremities: hands, wrists, feet and ankles).

(b) for Portable Devices

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment and meets the FCC radio frequency (RF) Exposure Guidelines in Supplement C to OET65. This equipment has very low levels of RF energy that are deemed to comply without testing of specific absorption ratio (SAR).
