To Whom It May Concern:

The DSC WS4904 and WS4904P Wireless Motion Detectors are built using the same PCB assembly (based on UA523 Rev. 02), plastic enclosure and PIR sensor and have similar functionality.

The only difference between the two models is the Pet Immune type of lens used for the WS4904P model. This type of lens is ensuring a greater immunity to pet movements in the protection-covered area in order to reduce false alarms.

Respectfully yours,

A handwritten signature in black ink, appearing to read "Dan Nita", with a stylized flourish at the end.
