To Whom It May Concern:

With exception to an antenna tuning component the RF circuitry for both DSC Self Contained Wireless Security Systems, Models SCW9047-433 and SCW9045-433, are exactly the same.

The difference in antenna tuning component is needed to ensure the antenna response for both units is identical.

Therefore, I see no reason why the FCC/IC approval testing can't be conducted on the SCW9047-433 device only.

.

Respectfully yours,
