Declaration on Electrically Identical Models

TO WHOM IT MAY CONCERN

We, *Digital Security Controls*, declare on our sole responsibility that the new models **TL260GS, GS2060, TL265GS and GS2065** with FCC ID: **F5309GS260L** and IC: **160A-GS260L**

are all identical in hardware (UA557 Rev. 02) and software Ver 1.0

The only differences between the four different marketing model names are:

- Model TL260GS is equipped with an IP and a GSM alarm communication channel and connects to the external power supply through a 2 pin terminal block connection ,
- Model GS2060 is equipped only with GSM communication channel,
- Model TL265GS is equipped with an IP and a GSM alarm communication channel and connects to the external power supply through the PC-Link 5 pin header
- Model GS2065 is equipped only with a GSM communication channel

We attest that above difference are not relevant for any RF behaviour subject to regulatory items. Additional Spurious Emissions measurements on representative configurations have been performed to justify.

Therefore the provided test reports remain applicable for all four models.

If you have any questions, please feel free to contact us at the address shown below

Sincerely,

Dan Nita
Approvals Manager,
