## **Declaration on Electrically Identical Models**

TO WHOM IT MAY CONCERN

We, *Digital Security Controls*, declare on our sole responsibility that the new models **TL2553G-SM-NA, 3G2055-SM-NA, TL2553G-NA and 3G2055-NA** with FCC ID: **F53113G255SM** and IC: **160A-3G255SM**

are all identical in hardware (UA580 Rev. 01) and software Ver 3.0

The only differences between the four different marketing model names are:

- Model **TL2553G-SM-NA** is equipped with an IP and a 3G alarm communication channel and can connect to a third party application through an RS-422 interface,
- Model **3G2055-SM-NA** is similar to TL2553G-SM-NA model but it is equipped only with 3G communication channel (IP circuitry is depopulated),
- Model **TL2553G-NA** is equipped with an IP and a 3G alarm communication channel identical to the TL2553G-SM-NA model but it does not have the RS-422 interface populated.
- Model **3GS2055-NA** is similar to TL2553G-SM-NA model but it is equipped only with a 3G communication channel and it does not have the RS-422 interface populated.

We attest that above difference are not relevant for any RF behaviour subject to regulatory items. Additional Spurious Emissions measurements on representative configurations have been performed to justify.

Therefore the provided test reports remain applicable for all four models.

If you have any questions, please feel free to contact us at the address shown below

Sincerely,

Dan Nita, Approvals Manager, Ext. 2706
