

## **Exhibit 10 : User's Manual**

### **Background**

The production version of the Centron Electricity Meter will not be made available to Schlumberger customers until February of 1999. The only units that will be made available to Schlumberger customers between now and February, 1999, are Beta test units. Consequently, the Users Manual does not yet exist, and Schlumberger does not expect to create the Users Manual for the Centron Electricity Meter until later this year. However, the FCC compliance statement that Schlumberger expects to include in the Centron Electricity Meter Users Manual is given on the next page.

Should you require more information concerning the Centron Electricity Meter Users Manual, please contact Monty Simmons at (864) 843 - 5158.

**FCC Part 15, SUBPART C**

The CENTRON™ with RMR module has been tested and found to comply with the limits for an intentional radiator, pursuant to Part 15, Subpart C of the FCC Rules. This equipment generates, uses, and can radiate radio frequency energy. If not installed and used in accordance with the instructions, it may cause interference to radio communications.

The limits are designed to provide reasonable protection against such interference in a residential situation. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause interference to radio or television reception, which can be determined by turning the equipment on and off, the user is encouraged to try and correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna of the affected radio or television.
- Increase the separation between the equipment and the affected receiver.
- Connect the equipment and the affected receiver to power outlets on separate circuits.
- Consult the dealer or experience radio/TV technician for help.

Changes or modifications not expressly approved by Schlumberger Industries, Inc. could void the user's authority to operate the equipment.
