Re: *Schlumberger Resource Management Services, Inc.*  
Response to Request for Further Information  
FCC ID: F9CSCM3100  
Reference No.: 19119

Dear Mr. Dichoso:

We are writing in response to your request for further information concerning an application we submitted on behalf of Schlumberger Resource Management Services, Inc. to transfer the FCC Identification number of device F9CSCM3100.

On May 4, 2001, we received e-mail correspondence from you requesting further information regarding F9CSCM3100 (Reference No. 19119). Specifically, you requested that we submit external photographs, internal photographs, and photographs of all applicable antennas of the device, an exhibit indicating how the device complies with RF safety requirements (due to the output power), including the provision of MPE calculations taking into account the output power, antenna gains, and the use of the device, and installation/ user instructions for the device.

In response to the May 4, 2001 requests, we are uploading into the External Photograph exhibit folder associated with the pending application in the Office of Engineering and Technology's ("OET") application database non-photocopy external photographs of the device and all applicable antennas. According to an instructional letter forwarded to us on May 3, 2001, by Mr. Richard Fabina, Chief, Equipment Authorizations Branch, only external photographs are required to change the FCC Identification number of equipment associated with a transfer of

control transaction of the type involved in this case. Accordingly, no internal photographs are included.

As previously stated in our response on December 21, 2000, the location and positioning of the new FCC ID label, (the appearance of which was submitted in sketch form on December 21, 2000, pursuant to section 2.1033(b)(7) of the Commission's rules), will not change in future production of the device from the location or positioning of the old label.

Also in response to your May 4, 2001 request, we are uploading into the RF Exposure Info folder in the OET application database an RF emissions statement. Please note that the instant device is professionally installed and, as a result, no installation or user instructions are required.

Should you have any questions regarding this matter, please contact Zachary Zehner at (202) 383-3424 to expedite resolving any outstanding issues regarding the pending application.

Sincerely,

WILKINSON BARKER KNAUER, LLP
