RE: FCC ID FA7MX-SERIES

Dear Motomu,

I have a couple of items that must be cleared up on the documentation for this field disturbance sensor before I can proceed.

1.) Internal Photographs: It is an FCC requirement that all RF shielding be removed for photographs. Please resubmit. In addition, I find the photos a bit small. Please submit just one photo per page and as large as practical.
2.) Please provide test setup photos as an extraction from the test report. Do not submit the test report twice.
3.) The Block Diagram is not of sufficient detail to qualify for Confidentiality. Please submit new block diagram, or de-list the existing block diagram by submitting a new confidentiality request.
4.) The operational description is a bit weak. Please provide more detail as to how the circuitry performs it's functions. If this is to be Confidential, it can be requested.

All other items on the Application appear to be in order. Please resubmit the requested documents through the AmericanTCB website.

William H. Graff
Examining Engineer
President and Director of Engineering

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal pursuant to Section 2.917(c). Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not reply to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must attach your answers to email correspondence.
Reply to the examiner at the email address shown below. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
