

Exhibit 12: Operational Description

Emission Designator

First Symbol - type of modulation of the main carrier.

The modulation of the VCO is linearly FM modulated;
therefore, the first symbol = F

Second Symbol - nature of signal modulating the main carrier.

The signal consists of a single channel containing analog
information; therefore, the second symbol = 3

Third Symbol - type of information to be transmitted.

The information transmitted is analog voice; therefore, the
third symbol = E

The bandwidth of the device was measured to be 24.6 kHz;
therefore, the emission designator = 25K0F3E.
