Re: FCC ID FBR-RSPDL800B
Applicant: Fleetwood Group Inc.
Correspondence Reference Number: 5634
731 Confirmation Number: EA92169

Thank you for your email response of 01/20/1999. I would like to provide the following in response to your requests:

- 1.) I am resubmitting as an attachment a file DLREQA.DOC which is a revised confidentiality request which drops the request for the internal equipment photographs. I had sent this previously but apparently it never made it to you.
- 2.) The Users Manual does not completely reveal the aspect of the product usage to qualify it for Part 74 Grant of Certification. I dealt with this with George Tannahill in the original approval (FCC ID: FBR-RSPDL800A) and am sending 3 files that contain copies of a sequence of faxes that will help to clarify this:
 1. FCC12197.DOC Copy of Fax#1 to George Tannahill
 2. FCC13197.DOC Copy of Fax#2 to George Tannahill
 2. FCC2397.DOC Copy of Fax#3 to George Tannahill
- 3.) I seem to be having difficulty getting the Elite test reports to you. I am resending the test reports as an attachment in a file DLTEST74.DOC. This file contains complete test reports for the product in three parts: Report No. 20926 which covers the Part 15 aspect of the product (separate application); Report No. 19167 which covers the Part 74 aspect of the product and an amendment to Report No. 19167 which provided some additional test data for the product as requested by Mr. Tannahill.

This document is also submitted as an attachment in the form of a file DLRESP1.DOC.

I hope that this provides you with the information you need to allow the Grant of Certification to be completed.

Sincerely,

A handwritten signature in cursive script that reads "Harry Derks".
