Subject: Class II Permissive Change Application for FCC ID: FBRWRS7200

A Class II permissive change application was submitted for Fleetwood Group FCC ID: FBRWRS7200, and a grant was issued on February 22, 2012.

The device that was tested at the lab for purposes of the Class II test report used the values represented in the new schematic, specifically C12 and C31. Unfortunately, due to a clerical error at Fleetwood Group, when we provided the supporting documents for the Class II application, we did not provide a copy of the updated schematic; in error we provided a copy of the old schematic. This was strictly a clerical error, one that does not affect the compliance of the product. We would like to correct the error now by submitting the proper schematic file that represents the product approved in the Class II application.

Please advise if there are any problems with this request. We sincerely apologize for the confusion and inconvenience.

Sincerely,

A handwritten signature in black ink, appearing to read "Emil Ureel". The signature is written in a cursive style with a large, sweeping initial "E".

Emil Ureel
