

Statement

RF exposure

The statements regarding the RF safety information (see file RF_exposure_Ant.doc) will be included in the final version of the manual.

Explanation for using a test setup without the enclosure.

In order to set the radio in the relevant test modes it was necessary to have access to the radio via a computer. Since it was a pure plastic enclosure, which has no influence to the electrical and electromagnetic performance, it was kept open during the test.

Precautions were done to ensure that the worst-case conditions were measured.

Lothar Schmidt
