PCTEST TCB/CB
Division of PCTEST Engineering Laboratory Inc.
6660-B Dobbin Road,
Columbia, MD 21045

SUBJECT: **Michelin Tire Corporation**
FCC ID: FI5-R32EA031
Multiple Listing

Gentlemen:

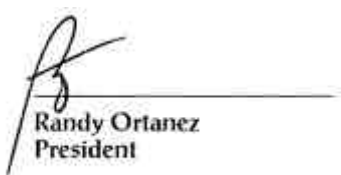

Transmitted herewith, on behalf of **Michelin Tire Corporation** is an application for a change in identity of a unit certified by **Applied Wireless Identifications Group Inc.**, FCC ID: OGSR32EA031 on August 9, 2006. The only difference between the two units is that the metal case has been removed and the board has been installed as a sub assembly into a larger cabinet. The FCC ID will be installed on the outside of the larger cabinet. (See details below)

Justification for Label Placement:

The drive-by-reader cabinet is designed to be installed outdoors, typically at commercial fleet truck depots. The label will be placed inside the equipment bay of the enclosure, as indicated in the figure 1. In this location, it is protected from weather and the dusty environment, which could otherwise cause a quick delamination, fading and degradation of legibility of the label.

Attached are the applicant's FCC ID label and location and external photographs.

Should you have any questions or comments concerning the above, please contact the undersigned.

Randy Ortanez
President
