

## MEMS Hand Held Unit (HHU)

This document relates to the Hand Held Unit that is part of Michelin Earthmover Management System and identified by the part numbers **RV3**.

### IMPORTANT

NOTE: This apparatus must not be modified in any way that causes its radio frequency performance to change from that established by the product in its original manufactured form. The antennas are a fixed part of the equipment and should not be tampered with. Failure to comply with these requirements may void the Product Warranty, as well as expose the end user to legal and/or financial liabilities. The device and its antenna must not be co-located or operating in conjunction with any other antenna or transmitter.

Any changes or modifications of equipment not expressly approved by the manufacturer could void the user's authority to operate the equipment and the company's warranty.

The equipment consists of the hand held unit and it's charging base, as illustrated.

Fig 1: The Hand Held Unit, which is part of the MEMS tyre pressure monitoring system for large earthmover vehicles.

Training in the use of the HHU will be provided by Michelin or their appointed representatives. The HHU is for use solely in conjunction with the MEMS Receiver installed in earth movers.
