This report shall not be reproduced except in full, without the written approval of the laboratory. This report must not be used by the client to claim product endorsement by NVLAP or any agency of the U.S. Government.

The maximum output power was measured at the antenna port by replacing the antenna with a spectrum analyzer and appropriate attenuation (6 dB). Refer to figure 1 for a plot of the maximum output power of the frequency spectrum produced by the EUT.

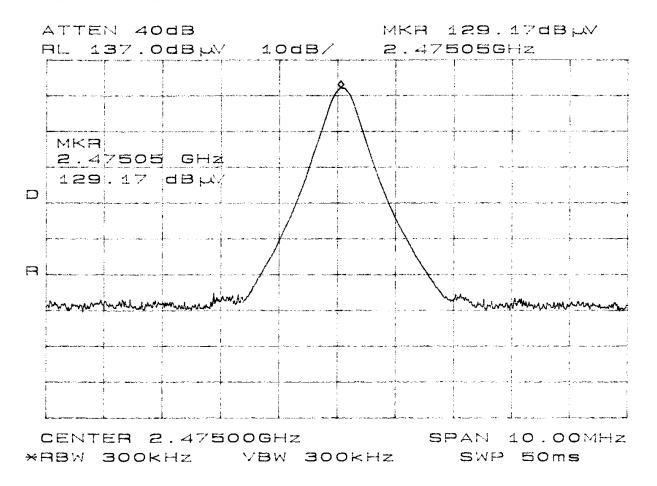

Figure 1. Maximum Output Power at Antenna Terminal.
