

## **1 Introduction**

The 05751 Anywhere LPT referred to herein is made of IAG PWA (06751) and SEGO PWA (06628), and a multi-protocol Radio-Frequency Identification (RFID) transponder. The transmitter of the 07751 RFID is battery-powered, microcontroller-controlled and communicates in the Inter-Agency Group (IAG) protocol.

## **2 Tune-Up Instructions**

The transmitter of the 07751 RFID is manufactured with fixed components and no means for tuning are provided. Transmitters are 100% tested to ensure compliance.
