Dear Chris Harvey

Hello,
Thank you for your message for TCB application.
The following data are submitted to a question.

1. Bluetooth Circuit

Please refer to attached sheet.

2. reason of selected low channel

Although always carried out at the lowest channel in the test,
the applicant (our customer) could not prepare a test program of fixing lowest channel.
At this time, the FCC15.31 (m) clause was applied,
the fixable near the lowest channel measured.

3. FRN information

The FRN of applicant (Japan CBM Corporation) is 0011508934.

Best regards,

JAPAN QUALITY ASSURANCE ORGANIZATION

> I have reviewed the TCB application for the above referenced device
> and

find that the following needs to be addressed before the application review can be completed:

>

> 1. The schematics that have been submitted do not include the actual Bluetooth Module circuitry. Please provide the Schematics for the Bluetooth Circuit.

>

> 2. Please indicate the reason for selecting 2403MHz as the lowest channel

frequency for many of the tests (2402MHz was selected for the band edge measurements which is appropriate). Typically the lowest frequency of operation is selected for all of the low channel testing.

>

> The items indicated above must be submitted before processing can continue

on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
