

Operating Instruction for Satisfying RF Exposure Compliance

Your cordless telephone contains a low power transmitter. When the Push-to-Talk button is pushed it sends out radio frequency (RF) signals. This device is authorized to operate at a duty factor not to exceed 50%. In August 1996, the Federal Communications Commission (FCC) adopted RF exposure guidelines with Safety levels for hand-held wireless devices.

CAUTION: To maintain compliance with the FCC's RF exposure guidelines, hold the transmitter and antenna at least 0.5 inches (1.25 centimeters) from your face with the antenna pointed up and away from the face. If you wear the handset on your body while using the headset accessory, use only the manufacturer's supplied belt clip for this product and ensure that the antenna is at least 1 inch (2.5 centimeters) from your body when transmitting.

This device and its antenna(s) must not be co-located or operated in conjunction with any other antenna or transmitter, use only the supplied antenna. Unauthorized antennas, modifications, or attachments could damage the transmitter and may violate FCC regulations.

This phone device has an output power of maximum 19mW, which no warning statements required. Now this phone (device) is designed so that the antenna is at least 0.5 inches from your face. Therefore, this phone device satisfies RF exposure compliance.
