**FCC ID: FSO-IRISMP6**

22<sup>nd</sup> January 2013

**Attestation Statement**

The IRIS MP6 (FCC ID: FSO-IRISMP6) is the infotainment system fitted exclusively to the McLaren MP4-12C car. IRIS MP6 has an intentional radiator transceiver that operates in the 2.4GHz Bluetooth band. The transceiver is mounted in the main head unit assembly and is connected through Fakra type automotive connectors and 2.5m of RF coax cable to a Laird Automotive antenna (Data sheet is attached as an appendix).

The Laird antenna is mounted on an antenna tray positioned below the base of the windscreen. The antenna tray is covered by a fixed fascia and there is no access to the antenna or connections unless the vehicle is dismantled. The antenna is fixed to the car and requires special tooling to gain access to it so meets the requirements of FCC Paragraph 15.203.

The antenna positioning is such that it is mounted at a distance of greater than 20cm from the occupants and is compliant with FCC rule part 2.1091.

Yours faithfully
