- 1. Connect power plug and audio line. And set up the speaker system.
- 2. To turn on the speaker, you can either press the power button on remote or long press the MODE button on speaker panel. After it is turned on, the LED screen becomes blue and blinks; now it is ready to run pairing. After pairing process is finished, the LED is constantly blue. Now the system is ready to play music. To stop the music, press the OII on panel or remote. Press it again, the music would continue. Press the \biguplus button on panel or remote to play the previous

| | track; Press the button on panel or remote to play the next track. |
|----|---|
| | User can short press the VOL+ on panel or remote to increase volume; long press |
| | the VOL+ to increase volume continuously. And short press the VOL- on panel or |
| | remote to decrease volume; long press the VOL- to decrease volume continuousl |
| 3. | The PAIR and TWS buttons on remote are only workable under Bluetooth status. |
| 4. | TWS Operation Function |
| | Under Bluetooth status without any device paired, press the power button on |
| | remote or long press the MODE button on speaker panel to turn on the speaker. |
| | |

- For the other speaker, run the same process. Long press on panel or short press TWS button on remote, the main speake will beep. Then the two speakers will star pairing. After pairing is finished, the two LEDs on two speakers will become constantly blue. Then user can open Bluetooth device to run search mode and pair with SP-HF2800BT. After the pairing is done, it is
- 5. Under power-on status, short press LINE on remote or button on panel, the LED will show constant LINE. Connect audio device with audio line, and it will ready to play music. To stop the music, press the on panel or remote. Press it again

ready to play music.

English

Both the and buttons are not workable under LINE status. The two buttons are only workable when under Bluetooth status or under USB drive operation. You can short press the VOI+ on panel or remote to increase volume. long press the VOL+ on panel or remote to increase volume continuously. And short press the VOL- on panel or remote to decrease volume; long press the VOL- on panel or remote to decrease volume continuously.

6. Both the and buttons are not workable under LINE status(panel and

7. Under power-on status, when there is USB drive connected, short press USB on remote or MODE on panel, the LED will sows USB symbol and play music from 00:00. When the music is been played, press the on panel or remote to stop playing. Press it again, the speaker would continue playing music. Press the button on panel or remote to play the previous track; Press the button on panel or

English

User can short press the VOL+ on panel or remote to increase volume; long press the VOL+ to increase volume continuously. And short press the VOL- on panel or remote to decrease volume; long press the VOL- to decrease volume continuously.

Under any circumstance, the speaker system will enter USB play mode when a USB drive is connected.

9. MODE Loop:

When there is no USB drive connected, the speaker system will enter a Loop mode of Bluetooth and LINE cycle. When USB drive is connected, the Loop mode turns into a cycle of "LINE-> USB->Bluetooth" pattern.

When the cycle goes into Bluetooth mode, if there is a device paired before, it will connect the device automatically. If there is no device paired before, the system wil

When the cycle goes into USB mode, the speaker will continue to play the track which was played last time.
